FOR IMMEDIATE RELEASE

Club Car Introduces Monsoon XL Canopy for Precedent Villager 4 Golf Cars

Keeps Occupants Dry and Seamlessly Incorporates Other Accessories

Augusta, Ga. (June 20, 2011) -- Owners of Club Car's Precedent Villager 4 golf cars can now remain dry in the heaviest downpours, thanks to the newest accessory for this vehicle: the Monsoon XL Canopy. A significant leap forward in functionality and customer ergonomics, this canopy offers features not seen in other golf car manufacturer's offerings.

The result of years of development and refinement, the new canopy is made of blow molded, double-wall, impact-resistant polyethylene (HDEP). Using this material allowed for the design of a canopy that is robust and can aesthetically integrate new features and optional accessories.

The canopy's increased dimensions combined with a unique built-in drainage system flows more than three gallons of water per minute, or 14 inches of rain per hour, keeping the car and all four occupants dry and comfortable.

An optional in-canopy ventilation system provides air flow, cooling and insect abatement—an industry first among the OEM manufacturers. The canopy is also designed with built-in speaker, stereo/radio and strobe light mounts as well as a unique no-drill track mounting system for owners who wish to add full enclosures.

"The size and durability of the Monsoon XL canopy, coupled with its accommodating design, make it a versatile, valuable addition for this vehicle that is used in such a wide range of applications," says Kurt Meyer, Club Car's commercial/industrial marketing manager.

The stylish four-passenger Precedent Villager 4 is a favorite among individual, business and industrial owners. It is built on a rustproof aluminum frame, features front and rear suspension systems for sport-like handling, and comes in electric or gas models.

The Monsoon XL Canopy is now available in white or beige at Club Car dealers and distributors. To find a dealer near you, visit www.clubcar.com and click "Dealer Locator."
